As part of Innovation Dublin, a number of high profile SFI funded CSETs (Centres for Science, Engineering and Technology) will come together to showcase their doctoral work. As part of "Thesis in Three" we'll welcome PhD students from around Ireland to explain their research in just three slides in three minutes. The presentations will cover the broad range of science, engineering and technology disciplines the CSETs are currently exploring in Ireland today. Participating CSETs are CLARITY, CNGL, CRANN, SBI, BDI and Lero.
